Landlords can no longer deduct all the cost of finance (such as mortgage interest, interest on loans to buy furnishings, or fees incurred taking out or repaying loans or mortgages) from property income. Instead, only a proportion will be allowed. For the 2017/18 tax year, the proportion drops to 75%, with 25% given as a basic rate deduction.

Based on the popular Developing Leadership Talent program offered by the acclaimed Center for Creative Leadership, this important resource offers a nuts-and-bolts framework for putting in place a leadership development system that will attract and retain the best and brightest talent. Step by step, the authors explain how alignment with strategic goals and organizational purpose and effective developmental experiences are the backbone of a successful leadership program. An authoritative and useful book, Developing Leadership Talent is an essential tool for any leadership program.

Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all

homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

There is no consensus on how strongly the Tax Cuts and Jobs Act (TCJA) has stimulated U.S. private fixed investment. Some argue that the business tax provisions spurred investment by cutting the cost of capital. Others see the TCJA primarily as a windfall for shareholders. We find that U.S. business investment since 2017 has grown strongly compared to pre-TCJA forecasts and that the overriding factor driving it has been the strength of expected aggregate demand. Investment has, so far, fallen short of predictions based on the postwar relation with tax cuts. Model simulations and firm-level data suggest that much of this weaker response reflects a lower sensitivity of investment to tax policy changes in the current environment of greater corporate market power. Economic policy uncertainty in 2018 played a relatively small role in dampening investment growth.

New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

The Abbot's Ghost, or Maurice Treherne's Temptation by Louisa May Alcott Louisa May Alcott (November 29, 1832 - March 6, 1888) was an American novelist and poet best known as the author of the novel *Little Women* (1868) and its sequels *Little Men* (1871) and *Jo's Boys* (1886).[1] Raised by her transcendentalist parents, Abigail May and Amos Bronson Alcott in New England, she also grew up among many of the well-known intellectuals of the day such as Ralph Waldo Emerson, Nathaniel Hawthorne, Henry David Thoreau and Henry Wadsworth Longfellow.

Libertarian journalist Kristin Tate provides a look into the wild world of frivolous taxation, aimed at educating members of her own generation in the evils of big government. In *How Do I Tax Thee?*, libertarian commentator and rising media star Kristin Tate takes us on a tour of the ways the government bleeds us dry in innumerable daily transactions and at various stages of life. We all know the government taxes our pay: federal, state, and local taxes are withheld by employers, as are social security payments. But what about the many other ways the government drains money from our wallets? Have you studied your cell phone bill? Customers in New York State pay an average of 24.36% in federal, state and local taxes on their wireless bills. They're also charged for obscure services they didn't ask for and don't understand like a universal service fund fee, an FCC compliance fee, a line service fee, and an emergency services fee. These aren't taxes, strictly speaking. The government imposes these administrative and regulatory costs, and your wireless provider passes them along to you. But the effect is exactly the same. What about your cable bill? Your power bill? Your water bill? The cost of a gallon of gas, a cab ride, a hotel stay and a movie ticket are all inflated by hidden fees. How much of what you pay at the pump, the box office, or the airport is really an indirect tax? In a series of short, pointed, fact-laden, humorous chapters, Tate exposes the vast government shakedown that consumes up to half of your income—and also explains where these hidden fees and taxes come from.

Reproduction of the original: *Napoleon Bonaparte* by John S.C. Abbott

Governance is a word that is increasingly heard and read in modern times, be it corporate governance, global governance, or investment governance. Investment governance, the central concern of this modest volume, refers to the effective employment of resources—people, policies, processes, and systems—by an individual or governing body (the fiduciary or agent) seeking to fulfil their fiduciary duty to a principal (or beneficiary) in addressing an underlying investment challenge. Effective investment governance is an enabler of good stewardship, and for this reason it should, in our view, be of interest to all fiduciaries, no matter the size of the pool of assets or the nature of the beneficiaries. To emphasize the importance of effective investment governance and to demonstrate its flexibility across organization type, we consider our investment governance process within three contexts: defined contribution (DC) plans, defined benefit (DB) plans, and endowments and foundations (E&Fs). Since the financial crisis of 2007 – 2008, the financial sector's place in the economy and its methods and ethics have (rightly, in many cases) been under scrutiny. Coupled with this theme, the task of investment governance is of increasing importance due to the sheer weight of money, the retirement savings gap, demographic trends, regulation and activism, and rising standards of behavior based on higher expectations from those fiduciaries serve. These trends are at the same time related and self-reinforcing. Having explored the why of investment governance, we dedicate the remainder of the book to the question of how to bring it to bear as an essential component of good fiduciary practice. At this point, the reader might expect investment professionals to launch into a discussion about an investment process focused on the best way to capture returns. We resist this temptation. Instead, we contend that achieving outcomes on behalf of beneficiaries is as much about managing risks as it is about capturing returns—and we mean “risks” broadly construed, not just fluctuations in asset values.

When a work of art has been created, what does the artist do to get the word out and sell the object? *Art & Reality* is an important how-to book that shows the artist not only what to do but also how to do it -- evaluating the work, planning marketing strategies, developing presentation materials, qualifying target markets, writing letters of introduction, and much more. At a time when cutbacks in the arts are routinely taking place, *Art & Reality* creates new avenues to assist artists in determining what must be done to survive and prosper. This book is for the person in the arts who may not be savvy about the dollar/cost side of doing business. The perfect marriage of creativity and the real world.
