Bloxels Arcade: Play Games by Bloxels Creators

Bloxels EDU is the most intuitive platform for creating video games in the classroom. When students build games, they become the writers, artists, designers, and developers of their own interactive stories. The Bloxels EDU app and Hub are made specifically for educators using Bloxels in their classrooms and makerspaces.

Bloxels EDU Hub

Developed by Doppler & Kargoh (brothers). We love programming super challenging video games. We also love making YouTube videos about Terraria, Boxel, Fortnite and other amazing games.

Connecting Teens with Technology at the Library presents a balanced view of the often complex relationship between teenagers and their technology. The authors share more than a dozen full lesson plans for technology-based programs, scalable for any library budget, that will help the reader to engage with their teenaged patrons.

This book serves as both a textbook and reference for faculty and students in LIS courses on storytelling and a professional guide for practicing librarians, particularly youth services librarians in public and school libraries. *Storytelling: Art and Technique* serves professors, students, and practitioners alike as a textbook, reference, and professional guide. It provides practical instruction and concrete examples of how to use the power of story to build literacy and presentation skills, as well as to create community in those same educational spaces. This text illustrates the value of storytelling, cover the history of storytelling in libraries, and offer valuable guidance for bringing stories to contemporary listeners, with detailed instructions on the selection, preparation, and presentation of stories. They also provide guidance around the planning and administration of a storytelling program. Topics include digital storytelling, open mics and slams, and the neuroscience of storytelling. An extensive and helpful section of resources for the storyteller is included in an expanded Part V of this edition. Offers readers a

thorough overview of the role of story and storytelling in the library Gives a convincing argument for the value of storytelling Provides practical tips on selecting, preparing, and telling stories Presents insights on storytelling to specific populations, including children, young adults, and those with special needs Includes an extensive list of resources

The book focuses on effective technology use and diffusion.

Coding, Robotics, and Engineering for Young Students builds foundational computer science and robotics skills and knowledge in bright Pre-K-grade 2 students. Originally developed as enrichment courses for Northwestern University's Center for Talent Development, this curriculum emphasizes active, hands-on, and collaborative learning. Students are challenged to learn computer science content, such as coding, and robotics and engineering concepts, as well as practice high-level academic skills, such as creative problem solving, computational thinking, and critical thinking. Instructional practices balance screen time with active, collaborative classroom engagement. Learning is deepened when students are challenged to navigate the transition from a virtual learning environment to a tangible learning environment. The lessons can be implemented as standalone enrichment experiences or as part of a coordinated scope and sequence that leads to higher level computer science and engineering studies. Grades Pre-K-2

Content-hosting websites, videoconferencing apps, grade- or subject-focused social media accounts: with such a dizzying array of mechanical and virtual help at our disposal, it can be a

challenge for educators to know where to even start. Educator and technology consultant Monica Burns can relate, which is why she wrote this book: to share strategies, tools, and insights that teachers can use, regardless of subject or grade level, to effectively incorporate technology in the classroom. Focusing on the "three Cs" of technology implementation—creation, curiosity, and collaboration—*Tasks Before Apps* offers K–12 teachers * Detailed advice for (and copious examples of) tech-infused lessons that help students meet learning goals while also developing vital digital citizenship skills. * Customizable checklists and graphic organizers for planning tech-enabled activities; choosing appropriate programs, devices, and platforms; and setting unit and lesson goals. * Recommendations for and links to apps and online resources that can facilitate and energize learning. * Reflection and brainstorming questions for use in book clubs and PLC discussions. Knowing how to navigate technology wisely—how to communicate effectively on posts and message boards, locate credible information on search engines, and select efficient, cost-effective equipment—is essential for both teachers and students. Whether you are a novice or a veteran, teach kindergarten students or high school seniors, this book is an indispensable guide to furthering academic skills, social development, and digital aptitude in the classroom.

Coding for Children and Young Adults in Libraries is an all-inclusive guide to teaching coding in libraries to very young learners. This book will provide all librarians, whether they are brand new to the idea of coding or fairly experienced with it, with both the foundation to understand coding and tools they can use

Organized into an easy-to-follow, month-by-month plan for implementation, this book provides field-tested and research-based knowledge that will serve educators as they create and maintain a meaningful Makerspace. Although science, technology, engineering, arts, and math have made huge gains in the past decade, STEAM jobs are not being filled at the rate they are being created or needed. Makerspaces in School promotes innovative thinking in students that fills this need. Through Makerspaces, project-based learning provides opportunities for credible, legitimate, and authentic growth and development. This book will allow any educator to walk away with a plan to create a Makerspace in his or her classroom or a school- or districtwide model that works for many. Makerspaces are very fluid places—each is unique in its own way! 2020 Teachers' Choice Award for Professional Development Winner
