This updated second edition of the Catechism of the Catholic Church incorporates all the final modifications made in the complete, official Latin text, accompanied by line-by-line explanations of orthodox Catholicism, summaries of each section, a detailed index, extensive cross-references, and helpful footnotes.

Mencius (also known as Meng Zi, Meng Ke, circa 372-289 BC) was the most prominent Confucian after Confucius, whose teachings were fundamental to Chinese culture for millennia. The book Mencius documented Mencius's conversations with his disciples and other relevant characters and highlighted his philosophy. This book provides a new translation of Mencius in plain and colloquial English, thorough annotations, in-depth commentaries to explain the Confucian philosophy, and modern perspectives of Mencius's ideas. The reader will find this book highly comprehensible, inspirational, and enjoyable to read. This is the eBook version in English of the book.

The contract of employment is the central legal institution of modern English employment law. It provides the foundation upon which most statutory employment rights are constructed; it provides a conduit for the implementation of norms negotiated in collective bargaining; and it continues to provide a contractual structure for the terms and conditions of employment for a significant proportion of the working population. The Contract of Employment provides the most ambitious and comprehensive treatise on the theoretical and doctrinal aspects of the English contract of employment in the common law world. Under the general editorship of Professor Mark Freedland, the text has been produced by a team of world leading experts in employment law. Part I examines the theoretical context to the contract of employment, studying its structure and development from a wide variety of theoretical and comparative perspectives. Part II provides an exposition and analysis of the doctrinal aspects of the contract of employment. The coverage of The Contract of Employment is unrivalled in its depth, detail and sophistication. The legal analysis is always informed by a keen sense of the modern labour market context of the contract of employment, and it is sensitive to contemporary challenges such as precariousness, the interaction with migration law, the role of legislation in the contract of employment, and the decline of collective bargaining. It will be the principal reference point for the practitioners, judges, and academics concerned with the contract of employment as a legal category, both nationally and internationally.

The Chinese Hsinhai Revolution explores and explains for the first time the important role of G. E. Morrison in great power diplomacy in China from the end of the Russo-Japanese War to the overthrow of the Qing Dynasty. The work is based on a wide range of multinational scholarly sources and in order to develop the context in which Morrison carried out his personal diplomacy and to delineate the many-sided story into which Morrison has to be placed, Woodhouse has in addition to mining the very rich Morrison collection, drawn upon British, Japanese and American personal and official materials.

This book attempts to prove the consistent nature of Paul's financial policy by drawing from his social environment and theological convictions to tease out a three-way relational pattern with God as the source of all possessions. This three-way relational framework not only dictates Paul's decision to accept or reject finances from his churches but also directly challenges long-standing claims made about Paul's financial policy. After outlining the various approaches that scholars have taken to make sense of Paul's seemingly inconsistent financial policy, this book provides a close exegetical analysis of relevant passages in Philippians, 1 Corinthians, and 2 Corinthians in order to unearth a three-way relational pattern found in Philippians but that is absent from the Corinthian Correspondence. In Paul's positive gift-exchange relationship with the Philippians, God is acknowledged as the source of all possessions, whereas the Corinthians are criticized for striving after two-way exchanges that result in honor, power, and prestige.After this is demonstrated, a socio-theological reason for Paul's refusal of Corinthian gifts is propounded. Paul refused Corinthian support, not because they desired to patronize him as a dependent client, but because they sought to be under Paul as their superior, an act that neglected God as the superior source of all gifts in the divine economy. Paul therefore refuses their support to avoid two-way relationships of gift so prevalent in ancient society and to underscore the source of the gift of the gospel, the one from whom and through whom and to whom are all things - God.

Castiglione's Book of the Courtier (Il libro del cortegiano, 1528), a dialogue in which the interlocutors attempt to describe the perfect courtier, was one of the most influential books of the Renaissance. In recent decades a number of postmodern readings of this work have appeared, emphasizing what is often characterized as the playful indeterminacy of the text, and seeking to detect inconsistencies which are interpreted as signs of anxiety or bad faith in its presentation. In contrast to these postmodern readings, the present study conducts an experiment. What understanding does one gain of Castiglione's book if one attempts an early modern reading? The author approaches The Book of the Courtier as a text in which some of its most important aspects are intentionally concealed and veiled in allegory. W.R. Albury argues that this early modern reading of The Book of the Courtier enables us to recover a serious political message which has a great deal of contemporary relevance and which is lost from sight when the work is approached primarily as a courtly etiquette book, or as a lament for the lost influence of the aristocracy in an age when autocratic nation-states were coming into being, or as an impersonal textual field upon which a free play of transformations and deconstructions may be performed.

With the development of life science, modern medicine, electronic science and material science, acupuncture and moxibustion medicine must keep pace with the times. After decades of practice and research, Professor Zheng Mingde founded the theory of "Holographic Theory of Human Protruding Part and Electronic Acupuncture and Moxibustion" and pioneered to put forward and form a unique modern theory of acupuncture and moxibustion. The significance of Science of Modern Acupuncture and Moxibustion is to break one key for one lock, and one kind of medicine for one disease in traditional medical concept and, is to cure many diseases simultaneously with holographic and omni-directional treatment. Each instrument is a super acupuncturist and can treat lot of patients. It revitalizes the traditional acupuncture. It will be popular with every family for its modern, electronic and automatic characteristics. Every doctor can use it to create a medical miracle. Science of Modern Acupuncture and Moxibustion is a milestone in the development of acupuncture and moxibustion. It has an extremely important academic position in the history of the development of traditional Chinese medicine.

\* Expert, up-to-date guidance on the appropriate techniques of local chemical analysis \* Comprehensive. This volume is an ideal starting point for material research and development, bringing together a number of techniques usually only found in isolation \* Recent examples of the applications of techniques are provided in all cases Helping to solve the problems of materials scientists in academia and industry, this book offers guidance on appropriate techniques of chemical analysis of materials at the local level, down to the atomic scale. Comparisons are made between various techniques in terms of the nature of the probe employed. The detection limit and the optimum spatial resolution is also considered, as well as the range of atomic number that may be identified and the precision and methods of calibration, where appropriate. The Local Chemical Analysis of Materials is amply illustrated allowing the reader to easily see typical results. It includes a comparative table of techniques to aid selection for analysis and a table of acronyms, particularly valuable in this jargon-riddled area.

Sir Robert Anderson has put his Scotland Yard detective skills to use at understanding the Bible for many years, as he is the author of many noted books on the Bible. In this book he analyzes those "experts" who analyze the text of the Bible. This book provides evidence against the Higher Criticism of the Bible by such people as Westcott and Hort and other nonbelievers. Yes, nonbelievers are being trusted to give us the correct text of the Bible, but they should not be trusted, as they are sabotaging the Bible text. This book was highly praised when first published and went through five editions, but it is ignored by the so-called scholars of today. ----- Reviews: "It is a book which should be placed in the library of all who are repelled by the methods of the critics." —Daily Express "This is a work for the present age. Sir Robert Anderson has rendered immense service by its publication. It should be widely circulated." — The New "Valuable as the author's former works were, his latest volume excels them. . . . 'The Bible and Modern Criticism' should be read and digested by all thoughtful Christians, for its eloquent and scholarly testimony in favor of 'The Scriptures of truth' cannot fail to confirm believers and to assist waverers and all such as feel perplexed by the insidious reasonings of the New Critics. We could wish that copies of Sir Robert Anderson's book were placed on the study shelves of all ministers and teachers of the Gospel, and presented to the libraries of our theological colleges." — The English Churchman Sir Robert Anderson has written a trenchant and straight-forward book, which places critics, whether as radical as Prof. Cheyne or as conservative as Prof Driver, on their defense before men of common sense." — The New York Tribune
