Harley Davidson Sportster: Why is My Bike Vibrating ...

Harley-Davidson motorcycles, especially older models, vibrate because of their engine design. Pistons in Big Twin engines share a single crankpin, so they move simultaneously. The enormous weight is thrown around as these pistons move back-and-forth causes the vibration of the motorcycle.

Do Harleys Vibrate a Lot? (Explained ... - motorandwheels.com

Our Dyna mounts are designed with independent vertical and lateral stiffness. Vertical stiffness is soft to isolate vibration. Lateral stiffness is stiff to prevent engine instability or wobble. You don't have to add stabilizer links with our mounts. Our Touring and FXR mount is completely rebuildable.

Engine vibration at 1800-rpm and up 1340 evo 1994 dyna. Engine vib goes through whole bike shakes feet of pegs. Have changed both engine mounts, which made no difference at all at a loss what to do next.

Engine vibration at 1800-rpm and up 1340 evo 1994 dyna.
However, since they replaced the motor mount, there is significant vibration between 1000 and 1400 rpms. The bike vibrates like crazy when I downshift to engine brake when it hits that rpm range. I brought the bike back and the service manager told me to ride it for a while and the mount should “loosen up.”

from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.
