Engineering Metrology and Measurements is a textbook designed for students of mechanical, production and allied disciplines to facilitate learning of various shop-floor measurement techniques and also understand the basics of mechanical measurements.

With design of products changing frequently, and functional requirements becoming more demanding, batch production of high precision components has become a necessity. The advent of NC and CNC has enabled automation of batch manufacturing supported by computerisation of manufacturing systems. The book is a complete reference consisting of several technologies associated with modern automated manufacturing.

This book presents the select proceedings of the International Conference on Functional Material, Manufacturing and Performances (ICFMP) 2019. The book covers broad aspects of several topics involved in the metrology and measurement of engineering surfaces and their implementation in automotive, bio-manufacturing, chemicals, electronics, energy, construction materials, and other engineering applications. The contents focus on cutting-edge instruments, methods and standards in the field of metrology and mechanical properties of advanced materials. Given the scope of the topics, this book can be useful for students, researchers and professionals interested in the measurement of surfaces, and the applications thereof.
