A recent National Academy of Sciences inductee, Conrad Phillip Kottak offers an up-to-date holistic introduction to cultural anthropology. Kottak emphasizes why anthropology should matter to students and how students can use anthropology to better understand themselves. "Bringing It All Together" essays found on the online learning center demonstrate the integrated and comparative nature of anthropology. New "Through the Eyes of Others" essays offer the perspectives of foreign students and recent graduates who present their own cultures of origin in contrast with contemporary American culture. Thought-provoking questions now begin each chapter to highlight key themes and spark discussions and critical thinking.

Written by a prominent scholar in the field, Conrad Phillip Kottak, this concise, student-friendly, current introduction to cultural anthropology carefully balances coverage of core topics and contemporary changes in the field. While maintaining its connection with students through relevant examples, the combination of brevity, readability, and trusted content makes Mirror for Humanity a perfect match for cultural anthropology courses that use readings or ethnographies along with a main text.

Request a free 30-day online trial at www.sagepub.com/freetrial Via 100 entries or "mini-chapters," 21st Century Anthropology: A Reference Handbook highlights the most important topics, issues, questions, and debates any student obtaining a degree in the field of anthropology ought to have mastered for effectiveness in the 21st century. This two-volume set provides undergraduate majors with an authoritative reference source that serves their research needs with more detailed information than encyclopedia entries but in a clear, accessible style, devoid of jargon, unnecessary detail or density. Key Features- Emphasizes key curricular topics, making it useful for students researching for term papers, preparing for GREs, or considering topics for a senior thesis, graduate degree, or career.- Comprehensive, providing full coverage of key subthemes and subfields within the discipline, such as applied anthropology, archaeology and paleontology, sociocultural anthropology, evolution, linguistics, physical and biological anthropology, primate studies, and more.- Offers uniform chapter structure so students can easily locate key information, within these sections: Introduction, Theory, Methods, Applications, Comparison, Future Directions, Summary, Bibliography & Suggestions for Further Reading, and Cross References.- Available in print or electronically at SAGE Reference Online, providing students with convenient, easy access to its contents.

CULTURE is the latest addition to the M-series. This thoroughly updated 2nd edition magazine style text for the Introduction to Cultural Anthropology course offers scholarly content in an engaging design that will captivate your students. Through eye-catching pedagogical features, students develop a better understanding of the material and will retain a greater amount of course concepts. This book presents cultural anthropology in a way that is both captivating and relevant to today's student at a price that they prefer. More current, more portable, more captivating, plus a rigorous and innovative research foundation adds up to: more learning. When you meet students where they are, you can take them where you want them to be.

The single comprehensive treatment of the field, from the leading members of the Society of Ethnobiology The field of ethnobiology—the study of relationships between particular ethnic groups and their native plants and animals—has grown very rapidly in recent years, spawning numerous subfields. Ethnobiological research has produced a wide range of medicines, natural products, and new crops, as well as striking insights into human cognition, language, and environmental management behavior from prehistory to the present. This is the single authoritative source on ethnobiology, covering all aspects of the field as it is currently defined. Featuring contributions from experienced scholars and sanctioned by the Society of Ethnobiology, this concise, readable volume provides extensive coverage of ethical issues and practices as well as archaeological, ethnological, and linguistic approaches. Emphasizing basic principles and methodology, this unique textbook offers a balanced treatment of all the major subfields within ethnobiology, allowing students to begin guided research in any related area—from archaeoethnozoology to ethnomycology to agroecology. Each chapter includes a basic introduction to each topic, is written by a leading specialist in the specific area addressed, and comes with a full bibliography citing major works in the area. All chapters cover recent research, and many are new in approach; most chapters present unpublished or very recently published new research. Featured are clear, distinctive treatments of areas such as ethnozoology, linguistic ethnobiology, traditional education, ethnoecology, and indigenous perspectives. Methodology and ethical action are also covered up to current practice. Ethnobiology is a specialized textbook for advanced undergraduates and graduate students; it is suitable for advanced-level ethnobotany, ethnobiology, cultural and political ecology, and archaeologically related courses. Research institutes will also find this work valuable, as will any reader with an interest in ethnobiological fields.

"Most Americans are unaware that the United States is a major terminus for the people of Tonga, an island nation in the South Pacific. Small examines Tongan migration to the United States in a transnational perspective, stressing that many of the new migrant populations seem to successfully manage dual lives, in both the old country and the new. To that end, she describes life in contemporary Tongan communities and in U.S. settings."—Library Journal "The central idea of Voyages—that Tonga and all Tongans exist at this moment in time in a transnational space—comes through vividly and powerfully, and the durability of this image is testimony to the success of Small's experiment in ethnographic writing."—The Contemporary Pacific "Voyages is a valuable contribution to the literature on immigration and on Asian Americans. Its clear, informal prose style also makes it an ideal book for undergraduate or graduate classes in anthropology, sociology, cultural geography, or Asian American studies."—International Migration Review "To write a book that is both educational and entertaining is to be at once scholarly, thoughtful, and witty—a major achievement. Cathy Small understands what migration has meant, and still means in everyday lives, as she empathizes with the plight of islanders uncertain over their landfall and destiny, and she captures their own stories beautifully. Voyages is one of the most passionate and compassionate books on the South Pacific in recent years."—Pacific "Small weaves her stories and analysis with a clarity and compelling attentiveness to logic that do not sacrifice intricacy and nuance."—Journal of Asian American Studies In Voyages, Cathy A. Small offers a view of the changes in migration, globalization, and ethnographic fieldwork over three decades. The second edition adds fresh descriptions and narratives in three new chapters based on two more visits to Tonga and California in 2010. The author (whose role after thirty years of fieldwork is both ethnographer and family member) reintroduces the reader to four sisters in the same family—two who migrated to the United States and two who remained in Tonga—and reveals what has unfolded in their lives in the fifteen years since the first edition was written. The second edition concludes with new reflections on how immigration and globalization have affected family, economy, tradition, political life, identity, and the practice of anthropology.

Emigrating Beyond Earth puts space colonization into the context of human evolution. Rather than focusing on the technologies and strategies needed to colonize space, the authors examine the human and societal reasons for space colonization. They make space colonization seems like a natural step by demonstrating that if will continue the human species' 4 million-year-old legacy of adaptation to difficult new environments. The authors present many examples from the history of human expansion into new environments, including two amazing tales of human colonization - the prehistoric settlement of the upper Arctic around 5,000 years ago and the colonization of the Pacific islands around 3,000 years ago - which show that space exploration is no more about rockets and robots than Arctic exploration was about boating!

The new edition of Kottak's best selling text continues to offer a holistic introduction to anthropology that approaches the course from a four-field perspective. To emphasize anthropology's integrated and comparative nature, Bringing It All Together essays show how anthropology's sub-fields and dimensions combine to interpret and explain a common topic. Another distinctive feature, Understanding Ourselves, illustrates the relevance of anthropological facts and theories to students' everyday lives. In addition, every new copy of the eleventh edition is packaged free with a new student CD-ROM as well as PowerWeb

The Southern African country of Zambia with 72 tribes has experienced tremendous social turmoil during the last 48 years. The 13 million citizens migrated into the cities and professionals immigrated and scattered abroad in a growing Diaspora. The diversity of the Zambian society and globalization has created a cultural crisis. Satisfying Zambian Hunger for Culture discusses social and political history, gender rites of passage, food, religion, witchcraft, and recommendations for contemporary life in the 21st century. The17 chapter book puts the diverse Zambian African tribal customs, culture and technology into the modern digital age.
