The Concept of Anxiety (Danish: Begrebet Angest): A Simple Psychologically Orienting Deliberation on the Dogmatic Issue of Hereditary Sin, is a philosophical work written by Danish philosopher Søren Kierkegaard in 1844. The original 1944 English translation by Walter Lowrie (now out of print), had the title The Concept of Dread.

The Concept of Anxiety - Wikipedia

"The Concept of Anxiety" is a historical treatise on the concept of anxiety and its relation with the original sin as well as the concepts of Good and Evil. Kierkegaard examines those problems from the Christian perspective, though his approach to the Christian doctrine is quite differentiated from the formality of the official Christian dogma.

These repeated readings may seem like overkill, but The Concept of Anxiety is a dense, philosophically rich text which reveals more and more of itself with successive readings. It is written under one of Kierkegaard's many pseudonyms, which makes this book one of his so-called aesthetic works.

The first new translation of Kierkegaard's masterwork in a generation brings to vivid life this essential work of modern philosophy.

The first new translation of Kierkegaard's masterwork in a generation brings to vivid life this essential work of modern philosophy. Brilliantly synthesizing human insights with Christian dogma, Soren Kierkegaard presented, in 1844, The Concept of Anxiety as a landmark "psychological deliberation," suggesting that our only hope in overcoming anxiety was not through "powder and pills" but by embracing it with open arms. While Kierkegaard's Danish prose is surprisingly rich, previous translations—the most recent in 1980—have marginalized the work with alternately florid or slavishly wooden language. With a vibrancy never seen before in English, Alastair Hannay, the world's foremost Kierkegaard scholar, has finally re-created its natural rhythm, eager that this overlooked classic will be revived as the seminal work of existentialism and moral psychology that it is. From The Concept of Anxiety: "And no Grand Inquisitor has such frightful torments in readiness as has anxiety, and no secret agent knows as cunningly how to attack the suspect in his weakest moment, or to make so seductive the trap in which he will be snared; and no discerning judge understands how to examine, yes, exanimate the accused as does anxiety, which never lets him go, not in diversion, not in noise, not at work, not by day, not by night."

This edition replaces the earlier translation by Walter Lowrie that appeared under the title The Concept of Dread. Along with The Sickness unto Death, the work reflects from a psychological point of view Søren Kierkegaard's longstanding concern with the Socratic maxim, "Know yourself." His ontological view of the self as a synthesis of body, soul, and spirit has influenced philosophers such as Heidegger and Sartre, theologians such as Jaspers and Tillich, and psychologists such as Rollo May. In The Concept of Anxiety, Kierkegaard describes the nature and forms of anxiety, placing the domain of anxiety within the mental-emotional states of human existence that precede the qualitative leap of faith to the spiritual state of Christianity. It is through anxiety that the self becomes aware of its dialectical relation between the finite and the infinite, the temporal and the eternal.

This is a Danish classic available in translation. From the preface: "The Concept of Anxiety" is one of Kierkegaard's major works. It summarizes and anticipates themes that are developed in his other works, but not by presenting a unified perception. It has more the character of a work that constitutes a turning point: themes from earlier works (in particular Either/Or) are pursued in a broken way that gives a new starting point for later works. Even though "The Concept of Anxiety" is often an unreasonably difficult book, it is worthwhile to read as a gateway to the entire works of Kierkegaard. 'In the following chapters I will provide a thematic introduction to Kierkegaard's body of work based on "The Concept of Anxiety". In chapter 1, which in volume is already different from the others, I explore ways of thinking and major themes in The Concept of Anxiety, and then in the following chapters I pursue them in other works, only to return to The Concept of Anxiety. 'Since an introduction to Kierkegaard is also an invitation to read Kierkegaard himself; I give many text references as we go along, but I hope in a discrete way so that it does not disturb the coherent reading of the book. The text references are also extensive for another reason. When one wants to examine the major themes of Kierkegaard's work, it is important to connect these themes to the

individual works in order to get a feeling for both the often complex development in the individual text and for the differences and tensions between the individual works. At the same time I have in a more discursive way tried to hold on to questions, cross referencing them with the individual works'.

I saw that all the things I feared and which feared me had nothing good or bad in them save in so far as the mind was affected by them.-Spinoza, Treatise on the Correction of the Understanding. I would say that learning to know anxiety is an adventure which every man has to affront if he would not go to perdition either by not having known anxiety or by sinking under it. He therefore who has learned rightly to be anxious has learned the most important thing.-Kierkegaard, The Concept of Dread. ... one thing is certain, that the problem of anxiety is a nodal point, linking up all kinds of most important questions; a riddle, of which the solution must cast a flood of light upon our whole mental life.-Freud, General Introduction to Psychoanalysis.

For the first time in English the world community of scholars is systematically assembling and presenting the results of recent research in the vast literature of Søren Kierkegaard. Based on the definitive English edition of Kierkegaard's works by Princeton University Press, this series of commentaries addresses all the published texts of the influential Danish philosopher and theologian.

Man is spirit. But what is spirit? Spirit is the self. But what is the self? The self is a relation which relates itself to its own self, or it is that in the relation [which accounts for it] that the relation relates itself to its own self; the self is not the relation but [consists in the fact] that the relation relates itself to its own self. Man is a synthesis of the infinite and the finite, of the temporal and the eternal, of freedom and necessity; in short, it is a synthesis.
