When Caroline Roberts accepted a job at 25 Cromwell Street, the infamous address of Fred and Rose West, she was only 16. Realizing that there was something very malevolent about the couple, she left their employment soon after, glad to be rid of them. The story should have ended there, but a month later she was abducted by the Wests and suffered violent sexual abuse at their hands before being told that she would be killed and buried. Through a combination of luck and quick thinking, despite the trauma of what had happened, Caroline managed to escape to freedom. This is her story of those fateful days and the appalling aftermath.

Ambushed in the wilderness along with French missionaries, this early pioneer in America survived torture and captivity to become an esteemed advisor to the much-feared Mohawks and other Iroquois nations. Guillaume Couture's remarkable life shows how fate, adaptability and courage can influence the course of history. His life story teaches us some very contemporary lessons about the power of faith, experience and openness to other cultures. From centuries-old source documents, Michael Fenn has pieced together the remarkable story of a young carpenter's rise from obscurity to influence in 17th America - revealing the forgotten saga of an ancestor of thousands of Americans and Canadians.

James M Landis – scholar, administrator, advocate and political adviser – is known for his seminal contribution to the creation of the modern system of market regulation in the USA. As a highly influential participant in the politics of the New Deal he drafted the statute which was to become the foundation for securities regulation in the US, and by extension the founding principle of financial market regulation across the world. He was also a complex and in some ways tragic figure, whose glittering career collapsed following the revelation that he had failed to pay tax for a five year period in the 1950s. The oversight was to cost possible elevation to the Supreme Court, forced prosecution and sentencing in 1963 to one month's imprisonment, commuted to forced hospitalisation, and subsequent suspension of licence to practise. This candid and revealing book sets his life in the context of his work as an academic, legislative draftsman, administrator and Dean of Harvard Law School. In rescuing from history Landis's battles and achievements in regulatory design, theory and practice, it speaks directly to the perennial problems in financial market regulation - how to deal with institutions deemed too big to fail, how to regulate the sale of complex financial instruments and what role can the professions play as gatekeepers of market integrity. It argues that in failing to learn from the lessons of history we limit the capacity of regulatory intervention to facilitate cultural change, without which contemporary responses to financial crises are destined to fail.

An evaluation of eleven crucial campaigns and battles of World War II.

James Blake's life was getting better every day. A rising tennis star and People magazine's Sexiest Male Athlete of 2002, he was leading a charmed life and loving every minute of it. But all that ended in May 2004, when Blake fractured his neck in an on-court freak accident. As he recovered, his father—who had been the inspiration for his tennis career—lost his battle with stomach cancer. Shortly after his father's

death, Blake was dealt a third blow when he contracted zoster, a rare virus that paralyzed half of his face and threatened to end his already jeopardized career. In *Breaking Back*, Blake provides a remarkable account of how he came back from this terrible heartbreak and self-doubt to become one of the top tennis players in the world. A story of strength, passion, courage, and the unbreakable bonds between a father and son, *Breaking Back* is a celebration of one extraordinary athlete's indomitable spirit and his inspiring ability to find hope in the bleakest of times.

A bold new thesis in the study of the Civil War suggests Lee had a heretofore undiscovered strategy at Gettysburg that, if successful, could have changed the outcome of the war. Conventional wisdom has held that on the third day of the battle, Lee made one profoundly wrong decision. But there is much more to the story, which Tom Carhart addresses for the first time. With meticulous detail, Carhart revisits the historic battles Lee taught at West Point--the victories of Napoleon at Austerlitz, Frederick the Great at Leuthen, and Hannibal at Cannae--and reveals what they can tell us about Lee's real strategy. What Carhart finds: Lee's plan for a rear assault that, combined with Pickett's Charge, could have broken the Union forces in half. Only in the final hours of the battle was the attack reversed through the daring of an unproven young general--George Armstrong Custer.
