Welsh Slate: Archaeology and History of an Industry is published by the Royal Commission on Ancient and Historical Monuments of Wales and is the result of a collaboration with Dr David Gwyn, an industrial archaeologist who lives in Pen y Groes in the Nantlle Valley. The book brings together Dr Gwyn's life-long fascination with the industry and the Royal Commission's recording expertise and extensive visual archive.

~~Welsh Slate: Archaeology and History of an Industry ...~~

A brief history of the Welsh Slate Industry. This page may also be viewed in the Bosnian language, thanks to Amina Dugali?. The ruins of disused quarries are still a common sight in parts of North Wales. This is Blaenau Ffestiniog in Merioneth. In many ways the Slate industry in North Wales was as important to the local economy, culture and history of the area as was the Coal industry of South Wales.

Ar un adeg byddai llechi o chwareli Cymru yn mynd i doi adeiladau'r byd. Erbyn diwedd y bedwaredd ganrif ar bymtheg roedd cymaint ag un rhan o dair o'r holl lechi toi a gynhyrchid yn y byd yn dod o Gymru, gan gystadlu â chwareli yn Ffrainc a'r Unol Daleithiau. Mae'r llyfr hwn yn olrhain hanes y diwydiant. -- Cyngor Llyfrau Cymru

Slates from quarries in Wales once went to roof the world. By the late nineteenth century as many as a third of all the roofing slates produced worldwide came from Wales, competing with quarries in France and the United States. This book traces the industry from its origins in the Roman period, its slow medieval development and then its massive expansion in the nineteenth century – as well as through its long drawn-out decline in the twentieth.

This book is about the stone used to build the castles of Edward I in North West Wales. It provides a description of the available geological resources and the building materials used in the construction of Caernarfon, Conwy, Harlech and Beaumaris Castles. It takes a broad view of this subject, placing the stone used in the castles in the context of both earlier and later buildings across the region of study, from the Neolithic up until the present day. The book will serve as a useful source book for geologists, archaeologists, architects, representatives of the natural stone industry, historians and cultural heritage management professionals specifically and for academic and non-academic communities, travellers and tourism industry operators in general.

Throughout the twentieth century, Wales underwent rapid and far-reaching economic upheavals on such a scale that few avoided their impacts – from recessions, war, changing fortunes within the iconic steel and coal industries, the rise and decline of manufacturing, as well as the gradual rise to dominance of the service sector – the changes were as dramatic as was the intensity of attempts to deal with their consequences. Wales was a laboratory for government intervention in the economy, ranging from the attraction of investment and the clearance of land made derelict by industry, to the regeneration of urban areas. This is the first book to focus on these actions and to outline why, how and with what effect governments intervened, and it contains timely commentary as economic performance remains one of the most important issues facing contemporary Wales.

Online Library Welsh Slate Archaeology And History Of An Industry

An ambitious and extremely comprehensive reference book with hundreds of colour photos, presenting the whole of Wales' maritime history.

Reports on archaeological work undertaken ahead of an improvement scheme centred on Cathedral Square, the historic centre of Peterborough, by Northamptonshire Archaeology, now MOLA Northampton, commissioned by Opportunity Peterborough (Peterborough City Council).
