Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric

gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

The reader can rest assured that the words contained within will be understood by all speakers of Neo-Melanesian, regardless of individual dialect.

Social Capital, Professionalism and Diversity is a response to the challenges faced by teachers and other public sector professionals in attempting to manage an increasingly diverse population, whilst simultaneously being subjected to public scrutiny through measures of performance. Social capital has increasingly been seen by policy makers and academics as a possible resource for education, allowing children and young people, and the professionals who work with them, to do better as a result of having strong networks, relationships and trust. There has, however, been little attention to how social capital might actually be used by professionals within educational

contexts or to the benefits of enhanced social capital for children and young people, their families, and the professionals themselves. The contributors to this volume provide commentaries on what is known about social capital and its use in educational contexts; the engagement of teachers and other professionals with diversity; and social capital and diversity among children, young people and families. Social Capital, Professionalism and Diversity will appeal to teacher educators and policymakers with concerns about the challenges faced by teachers and other public sector professionals and with an interest in how social capital might enable an effective response to diversity in educational contexts. The book will be of particular interest and use to student and beginning teachers in responding to diversity as they develop their own professional identities and to practising teachers with an interest in pursuing new forms of professional renewal.
