Superb, in-depth survey explores animism, totemism, fetishism, creation myths, Egyptian priesthood, numerous deities, alchemy, Egyptian art and magic, other fascinating topics. Includes over 50 photographs and illustrations.

From Herodotus to The Mummy, Western civilization has long been fascinated with the exotic myths and legends of Ancient Egypt but they have often been misunderstood. Here acclaimed Egyptologist Joyce Tyldesley guides us through 3000 years of changing stories and, in retelling them, shows us what they mean. Gathered from pyramid friezes, archaeological finds and contemporary documents, these vivid and strange stories explain everything from why the Nile flooded every year to their beliefs about what exactly happened after death and shed fascinating light on what life was like for both rich and poor. Lavishly illustrated with colour pictures, maps and family trees, helpful glossaries explaining all the major gods and timelines of the Pharaohs and most importantly packed with unforgettable stories, this book offers the perfect introduction to Egyptian history and civilization.

Discusses ancient Egyptian mythology and its origins, the structure of the mythological world, and the gods, goddesses, and heroes featured in legend.

An authoritative guide to the Egyptian myths that sheds new light on an ancient way of understanding the world This survey of Egyptian mythology explores how the ancient Nile-dwellers explained the world around them. It delves into the creation and evolution of the world and the reigns of the gods on earth, before introducing us to the manifestations of Egypt's deities in the natural environment; the inventive ways in which the Egyptians dealt with the invisible forces all around them; and their beliefs about life after death. Through his engaging narrative, Garry Shaw guides us through the mythic adventures of such famous deities as Osiris, the god murdered by his jealous brother Seth; the magical and sometimes devious Isis, who plotted to gain the power of the sun god Re; and Horus, who defeated his uncle Seth to become king of Egypt. He also introduces us to lesser known myths, such as the rebellions against Re; Geb's quest for Re's magical wig; and the flaying of the unfortunate god Nemty. From stars and heavenly bodies sailing on boats, to the wind as manifestation of the god Shu, to gods, goddesses, ghosts, and demons—beings that could be aggressive, helpful, wise, or dangerous—Shaw goes on to explain how the Egyptians encountered the mythological in their everyday lives.

In our introduction we deal with the divergent character of some of the ancient myths so as to simplify the study of a difficult but extremely fascinating subject. It is shown that one section of the people recognized a Creator like Ptah, who begot himself and "shaped his limbs" ere he fashioned the Universe, while another section perpetuated the idea of a Creatrix who gave birth to all things. At the dawn of history these rival conceptions existed side by side, and they were perpetuated until the end. It is evident, too, that the theologies which were based on these fundamental ideas had undergone, ere the fusion of peoples occurred, a sufficiently prolonged process of separate development to give them a racial, or, at any rate, a geographical significance.

The new National Geographic Treasury of Egyptian Mythology is a stunning tableau of Egyptian myths, including those of pharaohs, queens, the boisterous Sun God Ra, and legendary creatures like the Sphinx. The lyrical storytelling of award-winning author Donna Jo Napoli dramatizes the timeless tales of ancient Egypt in the year when Angelina Jolie will make Cleopatra a multimedia star. And just like the popular National Geographic Treasury of Greek Mythology, the stories in this book will be beautifully illustrated to bring ancient characters vividly to life. The stories are embellished with sidebars that provide historical, cultural, and geographic context and a mapping feature that adds to the fun and fascination. Resource notes and ample back matter direct readers to discover more about ancient Egypt. With its attractive design and beautiful narrative, this accessible treasury stands out from all other mythology titles in the marketplace.

In this volume the myths and legends of ancient Egypt are embraced in a historical narrative which begins with the rise of the great Nilotic civilization and ends with the Graeco-Roman Age. The principal deities are dealt with chiefly at the various periods in which they came into prominence, while the legends are so arranged as to throw light on the beliefs and manners and customs of the ancient people. Metrical renderings are given of such of the representative folk songs and poems as can be appreciated at the present day. Egyptian mythology is of highly complex character, and cannot be considered apart from its racial and historical aspects. The Egyptians were, as a Hebrew prophet has declared, a "mingled people", and this view has been confirmed by recent ethnological research: "the process; of racial fusion begun in the Delta at the dawn of history", says Professor Elliot Smith, "spread through the whole land of Egypt". In localities the early Nilotic inhabitants accepted the religious beliefs of settlers, and fused these with their own. They also clung tenaciously to the crude and primitive tribal beliefs of their remote ancestors, and never abandoned an archaic conception even when they acquired new and more enlightened ideas; they accepted myths literally, and regarded with great sanctity ancient ceremonies and usages. They even showed a tendency to multiply rather than to reduce the number of their gods and goddesses, by symbolizing their attributes. As a result, we find it necessary to deal with a bewildering number of deities and a confused mass of beliefs, many of which are obscure and contradictory. But the average Egyptian was never dismayed by inconsistencies in religious matters: he seemed rather to be fascinated by them. There was, strictly speaking, no orthodox creed in Egypt; each provincial centre had its own distinctive theological system, and the religion of an individual appears to have depended mainly on his habits of life. "The Egyptian", as Professor Wiedemann has said, "never attempted to systematize his conceptions of the different divinities into a homogeneous religion. It is open to us to speak of the religious ideas of the Egyptians, but not of an Egyptian religion."É

In this book I have retold the legends of the Gods of ancient Egypt, legends, which were current in the "morning of the world," preserved to the present day engraved on stone and written on papyri. I have told them in my own way, adhering strictly to the story, but arranging the words and phrases according to the English method; retaining, however, as far as possible the expressions and metaphors of the Egyptian. In some cases I have inserted whole sentences in order to make the sense clear: these are in places where the story divides naturally into several parts, as in "The Battles of Horus," and "The Regions of Night and Thick Darkness"; where each incident, so like the one preceding and the one following, is kept distinct in the mind of the reader by this means. This repetition is quite in accordance with the style of Egyptian literature. The book is intended entirely for the general public, who are increasingly interested in the religion and civilisation of ancient Egypt, but whose only means of obtaining knowledge of that country is apparently through magazine stories in which a mummy is the principal character. It may be worth noting that in these legends of ancient Egypt mummies are not mentioned, except in the Duat, the home of the dead, where one naturally expects to find them. Though the book is intended for the unscientific reader, I have made some provision for the more serious student, in the Notes at the end. In these I have given the origin of the legend, the book or books in which that original is published, and the book where the translation into a modern language by one of the great scholars of the day can be found. Other translations there are in plenty, which can be seen in specialist libraries; many of these, however, are of use only to a student of Egyptian literature and language. I have arranged the sequence of the stories according to my own ideas: first, the legends of various, one might almost say miscellaneous, gods; then the legends of Osiris and the deities connected with him; lastly, the legends of Ra. At the very end are Notes on the legends, and a short index of all the gods mentioned.

A collection of traditional tales from around the world, reflecting the cultures and religions from which the stories come.

This in-depth study compares and contrasts how manufacturing and technology have been employed by both major powers and the "Newly Industrialized Countries" since 1945 as an effective tool for sustained economic growth.
