Biopsychology: (8th Edition) —John P.J. Pinel—Google Books

For this edition, original author John Pinel is joined by new co-author Steven Barnes, an educator, researcher, and visual artist who brings his knowledge to bear on the updated Tenth Edition. Barnes's expertise with interactive electronic artwork is particularly evident in the content he helped contribute to the Revel Biopsychology .

For courses in Physiological Psychology and Biopsychology Explore how the central nervous system governs behaviorBiopsychology presents a clear, engaging introduction to biopsychological theory and research through a unique combination of biopsychological science and personal, reader-oriented discourse. Original author

John Pinel and new co-author Steven Barnes address students directly and interweave the fundamentals of the field with clinical case studies, useful metaphors, and memorable anecdotes that make course material personally and socially relevant to readers. In addition to expanded learning objectives that guide students through the course, the Tenth Edition has been thoroughly updated to reflect this rapidly progressing scientific field. MyLab(tm) Psychology not included. Students, if MyLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyLab Psychology is an online homework, tutorial, and assessment product designed to personalize learning and improve results. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts.

For courses in Physiological Psychology and Biopsychology. A student-focused approach to how the central nervous system governs behaviour Biopsychology, 11th Edition presents a clear, engaging introduction to the discipline through a unique combination of biopsychological science and personal, reader-oriented discourse.

Addressing students directly, authors John Pinel and Steven Barnes interweave the fundamentals of the field with clinical case studies, social issues, personal implications, useful metaphors, and memorable anecdotes. The 11th Edition incorporates two new emerging themes ("thinking about epigenetics" and "consciousness") and includes up-to-date coverage of recent developments in the field.

Were you looking for the book with access to MyPsychLab? This product is the book alone, and does NOT come with access to MyPsychLab. Buy Introduction to Biopsychology with MyPsychLab access card 9e (ISBN 9781292059297) if you need access to the MyLab as well, and save money on this brilliant resource. Delves into how the central nervous system governs behaviour Introduction to Biopsychology, 9/e, introduces the study of the biology of behaviour; that is, the neural mechanisms of psychological processes in the central nervous system. This program combines biopsychological science and student-oriented discussion, interweaving the basics of this specialized field with clinical case studies and exploring the personal and social implications that arise. The author encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to readers.

Pinel encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to the reader. For undergraduate junior/senior level courses in Behavioral Neuroscience, Physiology of Behavior, Biopsychology, Human Neuropsychology, or Physiological Psychology. Biopsychology is an introduction to the study of the biology of behavior; it focuses on the neural mechanisms of psychological processes. The defining feature of Biopsychology is its unique combination of cutting-edge biopsychological science and student-oriented discourse. Rather than covering topics in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, personal implications, social issues, helpful metaphors, and memorable anecdotes.

Dr. James W. Kalat's BIOLOGICAL PSYCHOLOGY is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions, Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Pinel's textbook presents the fundamentals of the study of the biology of behaviour and makes the topics personally and socially relevant to the student. A key feature of 'Biopsychology' is its combination of biopsychological science and personal, reader-oriented discourse.

If your resolutions tend to look much the same from one year to another and you are suffering from the suspicion that someone, somewhere is having more fun that you, then you need something to revitalise your lust for life. A YEAR IN HIGH HEELS is here to help. This book will guide you through the months with a perfectly co-ordinated combination of culture and challenges. With a monthly muse to inspire, and a suggested title for that soon-to-be-formed book club, dumbing down is so last season. Erin O'Connor, Diane von Furstenberg, Matthew Williamson and others share their secrets about their favourite places - so the next time you check in you'll know what to check out - while Dita von Teese, Anya Hindmarch and Christian Lacroix show you how to undress, how to go green and how to appreciate opera. Eclectic, practical and fantastical, A YEAR IN HIGH HEELS is crammed with fascinating stories, inspiring ideas and surprisingly sensible advice. Forget who, when, why and what to wear. Get ready to wow!

Mind Design: The Adaptive Organization of Human Nature, Minds, and Behavior does what most books on the subject don't do. It deals with the "big questions" in psychology and philosophy from an evolutionary neuroscience perspective. This highly readable volume provides a provocative look at the evolutionary origins and neurophysiological underpinnings of mind—including free will, the self, biological origins of the duality of human moral nature, human mate value and mate selection, the sensory/perceptual systems as adaptive virtual reality machines, and the emotions, intelligence, and consciousness as evolved psychological adaptations.

Focusing on experimental methods, authors Anne Myers and Christine Hansen lead students step by step through the entire research process, from generating testable hypotheses to writing the research report. The major sections of the book parallel the major sections of a research report (Introduction, Method, Results, and Discussion), giving students the skills they'll need to design and conduct an experiment, analyze and interpret the research findings, and report those findings. Although the main focus is on experimentation, alternative approaches are discussed as important complements. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
