In recent years a reawakening has taken place in the study of American archæology and antiquities, owing chiefly to the labours of a band of scholars in the United States and a few enthusiasts in the continent of Europe. For the greater part of the nineteenth century it appeared as if the last word had been written upon Mexican archæology. The lack of excavations and exploration had cramped the outlook of scholars, and there was nothing for them to work upon save what had been done in this respect before their own time. The writers on Central America who lived in the third quarter of the last century relied on the travels of Stephens and Norman, and never appeared to consider it essential that the country or the antiquities in which they specialised should be examined anew, or that fresh expeditions should be equipped to discover whether still further monuments existed relating to the ancient peoples who raised the teocalis of Mexico and the huacas of Peru. True, the middle of the century was not altogether without its Americanist explorers, but the researches of these were performed in a manner so perfunctory that but few additions to the science resulted from their labours.

Written over a broad span of time from 1962 to 2000, the stories collected here reflect the built-in variety of his fictional concerns and the changing tones of his narration.

Musical performance has been a part of television since the introduction of the medium. The styles and production requirements of music and of television have long influenced the other. Murray Forman gives the history of this interaction, going back to the early years of television, before the broadcast networks, up through the late fifties. He explores the full range of popular music from show tunes to Latin in a wide variety of television programs, and shows how the standards of presentation and performance developed.

While the black and white racial experience has been delineated over the years, the ethnic realities of Latinos have received minimal attention. Therefore, with Latinos projected as the upcoming U.S. population majority, the central goal of this book is to document the Latino experience in the world of academia, focusing primarily, but not exclusively, on first-generation Latino students in higher education, delineating the dynamics of the educational journey, while situating their experiences within the ethnic community, the overall American society, and the international community. The text focuses on (1) ethnic realities including Latino student access to higher education, retention, graduation rates, and career success; (2) analysis of historic trends; (3) extensive review of prior empirical studies; (4) a holistic portrayal of education in the U.S.; (5) a qualitative study conducted in an institution of higher education in Texas, placing the stories of participating Latino students in theoretical context; (6) vivid documentation of historically entrenched racial ideologies in American education; (7) exploration of potential solutions to historical and contemporary barriers confronting Latino students; (8) development of a model of empowerment for Latino students; (9) information for the establishment of a balanced educational system; (10) accountability of higher education institutions; (11) review of revolutionizing education in the midst of current globalization; and (12) venturing into the future of Latino education in the overall American experience. Finally, the book seeks to examine not only America's racism that is evident, but also the structural, cultural, and ideological forces that have influenced and continue to perpetuate the current educational situation for Latinos.
