Technique Systems in Chiropractic describes and analyses the most common techniques in today's chiropractic. These techniques, sometimes called brand-name or proprietary techniques, each provide a step-by-step protocol for proceeding from examination findings to adjustive and other treatment procedures. Until now, the most readily available descriptions of these techniques have taken the form of articles and seminar advertisements written and distributed by the technique innovators themselves. Major chiropractic technique textbooks frequently list these techniques and some provide synopses, but they do not include the detail really required for readers to come to any serious conclusions about their safety and efficacy. In Technique Systems in Chiropractic, the authors describe
