The origin and early years of any rapidly changing scientific discipline runs the risk of being forgotten unless a record of its past is preserved. In this, the first book-length history of clinical chemistry, those involved or interested in the field will read about who and what went before them and how the profession came to its present state of clinical importance. The narrative reconstructs the origins of clinical chemistry in the seventeenth century and traces its often obscure path of development in the shadow of organic chemistry, physiology and biochemistry until it assumes its own

identity at the beginning of the twentieth century. The chronological development of the story reveals the varied roots from which modern clinical chemistry arose.

The development of therapy with anti-angiogenics or vascular endothelial growth factor inhibitors (anti-VEGF) has marked the beginning of a new era in neovascularization and macular edema treatment. Its main goals are the inhibition of growth and development of new vessels along with the reduction of vascular permeability. The advantages over conventional laser photocoagulation are evident as laser treatment always leaves scars and causes a retinal sensitivity deterioration. Starting with an outline of treatment principles, this volume covers all aspects of anti-VEGF therapy for ophthalmological disorders. In particular,

specific chapters are dedicated to age-related macular degeneration, degenerative myopia, angioid streaks, inflammatory diseases, hereditary dystrophies, retinal vein occlusion, diabetic retinopathy, ocular tumors, as well as anterior segment neovascularization. The book gives an update on the application of anti-VEGF in ocular diseases to general ophthalmologists as well as retina specialists.

Posterior segment complications of cataract surgery are encountered not only by the cataract and retinal surgeons but also by the general ophthalmologists in their daily practice. Yet, a definitive volume on this subject is not available. Written by experts in the field of cataract surgery and vitreoretinal surgery, this book is a comprehensive, updated practical guide on evaluation and management of patients with posterior segment complications
