Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

PHMSA's 2016 Emergency Response Guidebook provides first responders with a go-to manual to help deal with hazmat transportation accidents during the critical first 30 minutes. DOT's goal is to place an ERG in every public emergency service vehicle nationwide. To date, nearly 14.5 million free copies have been distributed to the emergency response community through state emergency management coordinators. Members of the public may purchase a copy of the ERG through the GPO Bookstore and other commercial suppliers. First responders, we want your feedback! Submit your name, organization, contact information, and comments to ERGComments@dot.gov.

2020 Emergency Response Guidebook ERG United States Government DOT Department of Transportation PHMSA's 2020 Emergency Response Guidebook (ERG) provides first responders with a go-to manual to help deal with hazmat transportation accidents during the critical first 30 minutes. DOT's goal is to place an ERG in every public emergency service vehicle nationwide. It is a guidebook intended for use by first responders during the initial phase of a transportation incident involving dangerous goods or hazardous materials.

Developed jointly by the governments of Canada, the U.S. and Mexico for use by fire fighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving dangerous goods. It is primarily a guide to aid first responders in quickly identifying the specific or generic hazards of the material(s) involved in the incident, and protecting themselves and the general public during the initial response phase of the incident. It is not intended to provide information on the physical or chemical properties of dangerous goods. Comprehensive!

NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT- OVERSTOCK SALE -Significantly reduced listprice The official Emergency Response Guidebook (ERG) is a guide for use by transporters, firefighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving a hazardous material. The ERG is updated every three to four years to accommodate new products and technology."

"The Emergency Response Guidebook (ERG2008) was developed jointly by the US Department of Transportation, Transport Canada, and the Secretariat of Communications and Transportation of Mexico (SCT) for use by firefighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving a hazardous material. It is primarily a guide to aid first responders in (1) quickly identifying the specific or generic classification of the material(s) involved in the incident, and (2) protecting themselves and the general public during this initial response phase of the incident"--Home page of source document on the Internet.

Written by a hazardous materials consultant with over 40 years of experience in emergency services, the five-volume Hazmatology: The Science of Hazardous Materials suggests a new approach dealing with the most common aspects of hazardous materials, containers, and the affected environment. It focuses on innovations in decontamination, monitoring instruments, and personal protective equipment in a scientific way, utilizing common sense, and takes a risk-benefit approach to hazardous material response. This set provides the reader with a hazardous materials "Tool Box" and a guide for learning which tools to use under what circumstances. Volume One, Chronicles of Incidents and Response, takes an in-depth look at the history of hazardous materials response, points out lessons learned from these incidents, and discusses the impact on our response today. Volume Two, Standard of Care and Hazmat Planning, presents the hazardous materials legal issues and background on the Hazmat Standard of Care, including incidents where Care was violated and the repercussions felt. Volume Three, Applied Chemistry and Physics, presents chemistry and physics at the level that emergency responders will understand so they can apply the concepts using a risk management system and deal safely and effectively with hazardous materials incidents. Volume Four, Common Sense Emergency Response, covers stabilization and includes science and risk analysis and the part it plays in a successful outcome of the stabilization portion of the response. Volume Five, Hazmat Teams Spotlight, covers the history, vehicles, types of response, equipment, and resources, as well as procedures and innovations across different teams nationwide.
