Grieving Beyond Gender: Understanding the Ways Men and Women Mourn is a revision of Men Don't Cry, Women Do: Transcending Gender Stereotypes of Grief. In this work, Doka and Martin elaborate on their conceptual model of "styles or patterns of grieving"   a model that has generated both research and acceptance since the publication of the first edition in 1999. In that book, as well as in this revision, Doka and Martin explore the different ways that individuals grieve, noting that gender is only one factor that affects an individual's style or pattern of grief. The book differentiates intuitive grievers, where the pattern is more affective, from instrumental grievers, who grieve in a more cognitive and behavioral way, while noting other patterns that might be more blended or dissonant. The model is firmly grounded in social science theory and research. A particular strength of the work is the emphasis placed on the clinical implications of the model on the ways that different types of grievers might best be supported through individual counseling or group support.

Do men and women grieve differently? This text, while emphasizing that there are many ways to cope with grief, offers a refreshing change from the popular gender stereotypes of grief. Two patterns of grieving are described: an intuitive pattern where individuals experience and express grief in an affective way (stereotyped as female); and an instrumental pattern where grief is expressed physically or cognitively (stereotyped as male). A third pattern representing a blending of these two is also introduced. Of critical importance is that such patterns are related to, but not determined by, gender; and each has distinct strengths and weaknesses. Organized into three main parts, this topical new text begins by defining terms, introducing and delineating the grief patterns, and rooting the book's concept in contemporary theories of grief. The second part speculates on factors that may influence individuals' patterns of coping with loss (e.g., personality, gender, culture, etc.). The final part considers implications and therapeutic interventions likely to be effective with different types of grievers.

In this  volume of rare sensitivity, penetrating understanding, and profound insights  (Rabbi Earl A. Grollman, author of Living When a Loved One Has Died), Dr. Kenneth Doka explores a new, compassionate way to grieve, explaining that grief is not an illness to get over but an individual and ongoing journey. There is no  one-size-fits-all  way to cope with loss. The vital bonds that we form with those we love in life continue long after death in very different ways. Grief Is a Journey is the first book to overturn prevailing, often judgmental, ideas about grief and replace them with a hopeful, inclusive, personalized, and research-backed approach. New science and studies behind Dr. Doka's teaching upend the dominant but incorrect view that grief proceeds by stages. Dr. Doka helps us realize that our experiences following a death are far more individual and much less predictable than the conventional  five stages  model would have us believe. Common patterns of experiencing and expressing grief still prevail, yet many other life changes accompany a primary loss. For example, the deaths of parents, even for adults, modify family patterns, change relationships, and alter old family rituals. Unique to this book, Dr. Doka also explains how to cope with disenfranchised grief! the types of loss that are not so readily recognized or supported by society. These include the death of ex-spouses, as well as non-fatal losses such as divorce, the end of a friendship, job loss, or infertility. In addition, Dr. Doka considers losses that might be stigmatized, including death by suicide or from disease or self-destructive behaviors such as smoking or alcoholism. And finally, Dr. Doka reminds us that, however painful, grief provides opportunities for growth.

 The authors have done their homework in reading and consulting with the prominent literature, especially regarding children. All this effort gives the book a solid background foundation and makes it readable, and well-usable, for both lay counsellors and professional providers, and for all of us who are engaged in the delicate and rewarding endeavor of Grief Therapy  - Naji Abi-Hashem, Clinical & Cultural Psychologist, Berkeley, California Praise for the First Edition: "The book provides an absorbing and challenging journey through the possible process involved in bereavement work, and encourages one to think broadly about how one can approach a bereaved person... this was a book I enjoyed reading very much, and which I found both theoretically sound and practically helpful" - Bereavement Care (Cruse) Counselling for Grief and Bereavement, Second Edition is a bestselling, introductory guide for professionals who work with people experiencing bereavement through death and other forms of loss. Focusing on practical assessment and intervention strategies, Geraldine Humphrey and David Zimpfer guide readers through the essential theory and skills needed to work with clients in a way which sensitively facilitates the process of grief, initiates healing and promotes a sense of growth. Setting out the broad principles for practice, the authors go on to show how these can be applied in working with individuals, families and groups and in relation to specific issues including chronic and life-threatening illnesses, palliative care and complicated grief. Carefully chosen case examples illustrate the counselling process, while specific attention is paid throughout to ethical considerations and the possible need for referral. This fully revised and updated Second Edition features a new chapter on working with children and adolescents: both from the perspective of young people who are grieving losses and those who are receiving palliative care as patients. While focusing on the practical, the book provides a firm theoretical base by explaining key concepts such as attachment, grief and resilience. Geraldine M. Humphrey is Counsellor in the Department of Psychology at the North Canton Medical Foundation, specializing in death, illness, and non-death and grief. David G. Zimpfer is former Director of the Cancer Center of Ohio.

With a Foreword by Robert A. Neimeyer, PhD "Where was this book when I was new as a counselor?...Fortunately, it is here now, and with all the scope, depth, resourcefulness, and balance required for such situations." -Dr. Robert Kastenbaum, PhD "This book will now be an indispensable resource for anyone who wants to understand, counsel, or otherwise help individuals with life-threatening illnesses and their family members." --Charles A. Corr, PhD, CT "Without question, this is the book you'll want your own caregivers to have read should you ever contend with life-threatening illness." --Therese A. Rando, PhD, BCETS, BCBT Life-threatening illness is not only a medical crisis; it is a psychological, social, and spiritual crisis as well. Also, serious illness affects not only the patient, but the patient's family. Therefore, the two major premises of this book are that care in life-threatening illness must be holistic, and it must be family centered. Doka presents an insightful, comprehensive guide for counselors, social workers, and health care professionals, as they assist clients experiencing a serious illness. The book builds on a model developed by the author, based upon earlier work by Avery Weisman and E. M. Patterson. Doka's model presents illness as a series of phases: Prediagnostic: individuals may decide how to handle troubling symptoms or to take certain diagnostic tests Diagnostic: centered on the existential crisis posed by the diagnosis Chronic: individuals must cope with the disease and treatment Recovery: acknowledges that even when individuals survive an encounter with life-threatening illness, there are still considerable issues that must be resolved Terminal phase: individuals deal with the inevitability of death In his discussion of each phase, the author delineates specific tasks for patients to perform and the issues they must adapt to. He also presents strategies for counselors and health care professionals to use with individuals in each phase of illness.

This book can enhance everyone's understanding of how women experience loss and grief, and how they transition to resolution. It is an invaluable resource to women and everyone who supports them! spouses, partners, and family members as well as community and government.   Explicates the socially constructed roles of women, in the past and in modern society, to illustrate what has been considered "appropriate" expression and response to loss and grief for women, and to enable a unique understanding the phenomenal loss experience for women   Presents an invaluable framework, as a scaffolding, that allows readers to interrogate their own and others' experiences of loss in a novel, more in-depth way!one that supports improved practice in the helping professions   Includes women's real-life stories that tell their truths of the loss experience and how grief worked through them in transitioning to resolution   Provides seminal information to professional grief counselors, physicians, nurses, clinical psychologists, and psychiatric social workers, as well as students of psychology, sociology, medicine, public health, and women's studies   Allows family members, friends, or partners to better understand what a woman who is experiencing loss and grief is feeling, and instructs how to support healthy transition through grief to resolution

"A new, compassionate way to understand grief as an individual and ongoing journey"--

This book focuses on the kind of grief that is not openly acknowledged, socially validated, or publicly mourned. It addresses the unique psychological, biological, and sociological issues involved in disenfranchised grief. The contributing authors explore the concept of disenfranchised grief, help define and explain this type of grief, and offer clinical interventions to help grievers express their hidden sorrow.

Understanding Grief is a comprehensive and accessible 'one stop' introduction to all the major models of grief. In addition to the individual perspective, bereavement is discussed in relation to social, cultural and religious factors and influences. Richard Gross also examines the impact of different types of bereavement, such as the death of a child, parent, spouse/partner, and sibling, and discusses the impact of traumatic death in relation to complicated grief. The text also covers pet loss, death anxiety, and post-traumatic growth. This innovative book combines personal accounts of grief with clinical accounts of patients provided by psychiatrists and psychologists, and research involving large numbers of bereaved individuals. Understanding Grief will be invaluable to all those working with bereaved clients, including bereavement counsellors, counselling and clinical psychologists, healthcare professionals, social workers, and the interested layperson. It is also suitable for people training to work with bereaved individuals.

Have you ever wondered why dogs are considered  man's best friend ? In this book, Psychologist Dr Christopher Blazina explains the importance of the unique bond between men and dogs. There are widely-held beliefs that males naturally transition into a state of self-imposed seclusion and emotional detachment in adulthood. Even relying on another person violates the rules of being a man. When Man Meets Dog explores how the bond with animal companions bypasses many of these barriers, helping males develop into happier, healthier men. What a difference a dog can make! It's also important to discuss the other side of attachment: loss. Again, the mixed messages men receive lead to difficulties with managing grief. When Man Meets Dog is the first book to discuss men's continuing bonds with a lost animal companion. A continuing bond is a new way of reconnecting and preserving the memory of this unique connection. When Man Meets Dog is a memoir with a purpose. Chris shares his very personal story of how two shelter dogs not only changed the direction of his life, but also how he defines what it means to be a man.
