The extraordinary and wonderful adventures which befall Phileas Fogg and his servant Passepartout when they set out to win a bet by going round the world in eighty days.

Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system.

Focusing on applied and clinical examples, the Second Edition of PRINCIPLES OF NEUROPSYCHOLOGY is an exciting and dynamic approach to neuropsychology that should inspire both students and teachers. This progressive and accessible text teaches brain function in a clear and interesting manner by providing the most recent studies and research available in this ever-developing field. Applying the underlying thesis that all interactions in daily life, whether adaptive or maladaptive, can be explained neuropsychologically, the authors emphasize five specific ideas: human neuropsychology-both experimental and clinical, integration of theory and research, coverage of the relationship between neuroscience and behavioral function, real-life examples, and the presentation of didactic aids. Integrating these themes with the most up-to-date research provides all readers-whether or not they have had previous exposure to the field-with the most current and accessible text available.

In 221 BCE the state of Qin vanquished its rivals and established the first empire on Chinese soil, starting a millennium-long imperial age in Chinese history. Hailed by some and maligned by many, Qin has long been an enigma. In this pathbreaking study, the authors integrate textual sources with newly available archeological and paleographic materials, providing a boldly novel picture of Qin's cultural and political trajectory, its evolving institutions and its religion, its place in China's history, and the reasons for its success and for its ultimate collapse.
