A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack-but far more fun to discover, as all of these delightful stories make abundantly clear.

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.

No Fear Transfers If you have never tried image transfers or have experienced image transfer mishaps, then Image Transfer Workshop is for you. This book presents step-by-step techniques for 35 image transfer processes, extensive tips for fixing mishaps and examples of how to combine transfers in finished pieces of mixed-media art. This comprehensive guide features: 35 Techniques: This book focuses exclusively on making transfers—from simple tape and gel medium transfers to more complex and out of the box techniques, like solar silk screens and plastic wrap transfers. Troubleshooting: Image Transfer Workshop includes extensive answers to help fix problems in transfers gone wrong. You'll learn what to watch for, what to do to get great transfers every time. Dual Styles, Dual Approaches: The authors' different styles illustrate how transfer techniques can take on completely different looks. Finished pieces of art for each technique and a section of completely stepped-out projects are sure to inspire you! Let Image Transfer Workshop help build your image transfer confidence.

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

From the USA Today Bestselling author of The Sword of the Templars and The Aztec Heresy Some secrets are too great to bear... Retired Army Ranger Lt. Col. John Holliday has reluctantly settled into his teaching position at West Point when young Israeli archaeologist Rafi Wanounou comes to him with desperate news. Holliday's niece—and Rafi's fiancé—Peggy has been kidnapped. Holliday sets out with Rafi to find the only family he has left. But their search for Peggy will lead them to a trail of clues that spans across the globe, and into the heart of a conspiracy involving an ancient Egyptian legend and the darkest secrets of the Order of Templar Knights. Secrets that, once known, cannot be survived...

Does a second chance at life and love always involve surrender? A three-year old son, a struggling café, and fading memories are all Robin Price has left of her late husband. As the proud owner of Willow Tree Café in small town Peaks, Iowa, she pours her heart into every muffin she bakes and espresso she pulls, thankful for the sense of purpose and community the work provides. So when developer Ian McKay shows up in Peaks with plans to build condos where her café and a vital town ministry are located, she isn't about to let go without a fight. As stubborn as he is handsome, Ian won't give up easily. His family's business depends on his success in Peaks. But as Ian pushes to seal the deal, he wonders if he has met his match. Robin's gracious spirit threatens to undo his resolve, especially when he discovers the beautiful widow harbors a grief that resonates with his own. With polarized opinions forming all over town, business becomes unavoidably personal and Robin and Ian must decide whether to cling to the familiar or surrender their plans to the God of Second Chances.

Authoritarian and totalitarian systems of individual countries have long been studied independently of each other. Only in recent years has a comparative perspective in the regional, chronological and system-oriented sense been applied, thus allowing many phenomena to be correctly understood and assessed. In the present anthology Mussolini's Fascism, National Socialism, and Communism are examined comparatively. Similarities, connections, and mutual influences in these dictatorships are sought. Finally, the transition from dictatorship to democracy is examined. With this collection of essays the editors intend to give impulse for inter-European comparative research on dictatorships and democracy. Gerhard Besier is director of the Hannah Ahrendt Institute for the Research on Totalitarianism at Technical University of Dresden (Germany). Katarzyna Stoklosa is a researcher at the Hannah Ahrendt Institute for the Research on Totalitarianism at Technical University of Dresden. Francesca Piombo is a researcher at the Hannah Ahrendt Institute in Dresden.
