Widely recognized as a leading text in its field, this popular guide explores literacy development beginning in infancy and through fourth grade. The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms, while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies. Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts through observation, research, curriculum development, and discussion. Sample observation and assessment forms assist in determining children's progress in developing literacy.

This concise, accessible book explores the connection between language acquisition and emergent literacy skills, and how this sets the stage for later literacy development. Chapters address formative early experiences such as speaking and listening, being read to, and talking about print concepts and the alphabet. Written for early childhood professionals, reading specialists, and speech-language pathologists, the book describes effective assessment and instructional approaches for fostering language learning and emergent literacy in typically developing children and those at risk for language delays. Vivid case examples illustrate specific ways to collaborate with parents to give all children a strong foundation for school readiness and success.

This book emphasizes both constructivist and explicit strategies for teaching literacy to young children within an integrated language arts approach. With a thought-provoking and rich presentation, renowned author, Lesley Morrow explores literacy developm

There is a robust body of knowledge suggesting that early language and literacy experiences significantly impact on future academic achievement. In contrast, relatively little has been written with respect to the early literacy development and experiences of deaf children. In *Early Literacy Development in Deaf Children*, Connie Mayer and Beverly J. Trezek seek to fill this gap by providing an in-depth exploration of how young deaf children learn to read and write, identifying the foundational knowledge, abilities, and skills that are fundamental to this process. They provide an overview of the latest research and present a model of early literacy development to guide their discussion on topics such as teaching reading and writing, curriculum and interventions, bilingualism, and assessment. Throughout, they concentrate on the ways in which young learners with hearing loss are similar to, or different from, their hearing age peers and the consequent implications for research and practice. Their discussion is wide-reaching, as they focus on children from various cultural and linguistic backgrounds, those with additional disabilities and hearing losses ranging from mild to profound, and those using a range of communication modalities and amplification technologies, including cochlear implants. With the implementation of Universal Newborn Hearing Screening and advancements in hearing technologies that have heightened both the emphasis on literacy development in the early years and the importance of these years in the ultimate development of age-appropriate reading and reading outcomes, this timely text addresses a topic that has thus far eluded the field.
