address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

This is an easy-to-use reference with nursing care plans for healthy clients during pregnancy, labor and delivery, postpartum, and the newborn periods. Additional diagnoses and plans are included for common perinatal and neonatal complications. The user can easily design a client-specific plan of care with interventions that are based on the latest research and current practice.

A better way to learn maternal and newborn nursing! This unique presentation provides tightly focused maternal-newborn coverage in a highly structured text

Maternal Newborn Nursing Care Plans provides students with a necessary care plan reference that includes a strong nursing process approach and comprehensive coverage of maternity nursing content. The goal of the book is to provide interventions for both collaborative problems and nursing diagnoses. It emphasizes the use of standardized nursing languages, including NANDA diagnoses, NIC interventions, and NOC outcomes in each care plan. Includes over 65 of the most common normal and high risk care plans associated with maternal newborn nursing care. **UNIQUE!** Lists the collaborative problems or potential complications for every condition covered. Incorporates a consistent format presentation for

each content area that includes: 1) Focus on Collaborative Practice - definition, etiology, physical findings, diagnostic studies; 2) Collaborative Problems - list of collaborative problems and focus assessments; 3) Nursing Diagnosis Care Plans - list of each diagnosis, care plan for each nursing diagnosis that links NANDA, NIC, and NOC; and 4) Teaching/Collaborative Activities. Emphasizes collaboration throughout to show students how to use standardized approaches such as Critical Paths and individualized approaches (Nursing Care Plans) focusing on individualized care much the same as nurses do in practice. UNIQUE! Includes Care Plans from a wellness perspective to provide a greater emphasis on health promotion and prevention and to provide students with the necessary tools for care for areas other than just the problem. Integrates Home Care for certain interventions to stress the importance of follow-up care. Integrates Patient Teaching Interventions for certain diagnoses to help students understand the importance of teaching the patient self-care.

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I

nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

AJN Book-of-the-Year Award-Winner! A comprehensive women's health reference guide, this "pocket brain" delivers all the practical, evidence-based clinical information you need to care

for normal and high-risk pregnant mothers, newborns, and their families in diverse hospital and community settings. This book delves into other women's health issues that may impact the care of the mother-baby dyad, such as culture, substance abuse, family planning, violence against women and sexually transmitted infections. Perfect for students, new-to-practice, or expert practitioners, this guide provides concise, comprehensive assessments, easy-to-understand tables of lab work-ups and values, common treatment guidelines and the steps to implement and evaluate nursing care. As a special feature to assist with learning how to check a cervix, you can practice using the dilation milestone cut outs inside the book!
