The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Agaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

Revisit the thrilling Sam Owens series, with book two in the series from New York Times bestselling author J.T. Ellison. Dr. Samantha Owens is starting over: new city, new job, new man, new life. But before she's even unpacked her office at Georgetown University's forensic pathology department, she's called to consult on a case that's rocked the capital and the country. An unknown pathogen released into the Washington Metro has caused nationwide panic. Three people died—just three. Amid the media frenzy and Homeland Security alarm bells, Sam painstakingly dissects the lives of those three victims and makes an unsettling conclusion. This is no textbook terrorist, but an assassin whose motive is deeply personal and far from understandable. Mander Whitfield, a former army ranger and Sam's new boyfriend, knows about seeing the world in shades of gray. About feeling compelled to do the wrong thing for the right reasons. Only his disturbing kinship with a killer can lead Sam to the truth...and once more into the line of fire. Originally published in 2012 "Shocking suspense, compelling characters and fascinating forensic details." —Lisa Gardner, # 1 New York Times bestselling author "A terrific thriller...fans of forensic mysteries, such as those by Patricia Cornwell, should immediately add this series to their A-lists." —Booklist

The March 2018 British National Formulary (BNF 75) is your essential reference book for prescribing, dispensing, and administering medicines.

"An achaeological mystery, the story of young American Bruce Brandon, eager to ascertain more about the graves of Egyptian gods, is set against a clearly focused background of the Land of the Pyramids. Bruce is determined to find mummified crocodiles, which he believes were spirited away by reactionary priests during the reign of the ruler Akhenaten, who tried to introduce monotheism into Egypt." --Preface.

By quadrupling the number of people behind bars in two decades, the United States has become the world leader in incarceration. Much has been written on the men who make up the vast majority of the nation's two million inmates. But what of the women they leave behind? Doing Time Together vividly details the ways that prisons shape and infiltrate the lives of women with husbands, fianc\u00e9s, and boyfriends on the inside. Megan Comfort spent years getting to know women visiting men at San Quentin State Prison, observing how their romantic relationships drew them into contact with the penitentiary. Tangling with the prison's intrusive scrutiny and rigid rules turns these women into "quasi-inmates," eroding the boundary between home and prison and altering their sense of intimacy, love, and justice. Yet Comfort also finds that with social welfare weakened, prisons are the most powerful public institutions available to women struggling to overcome untreated social ills and sustain relationships with marginalized men. As a result, they express great ambivalence about the prison and the control it exerts over their daily lives. An illuminating analysis of women caught in the shadow of America's massive prison system, Comfort's book will be essential for anyone concerned with the consequences of our punitive culture.
