The Ocean City Sharks have to swim 75 laps by the end of the week, and every day they figure out how many laps are left to go. Swimming and subtraction are all part of the fun! This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 6 to 8.

Shark Swimathon by Stuart J. Murphy - Goodreads

The Ocean City Sharks swim team—Gill, Fin, Stripes, Tiny, and the hammerhead twins, Flip and Flap—really want to go the state swim meet, but they're short on funds. If they can swim 75 laps over the next four days, the local newspaper will sponsor them. The first day they swim a total of 14 laps ($75 - 14 = 61$).

Shark Swimathon - Stuart J. Murphy - Paperback

Shark Swimathon Shark Swimathon by Stuart J. Murphy. 3rd grade read aloud. This book is a great way to use children's literature in the math classroom. It begins with a group of sharks who want to go to the state swim camp, but they have to raise a lot of money to go. They were told that if they could swim 75 laps in four days that someone would pay for them to go to camp. So each day the ...

Blue Ribbon Blueberry Pie. If the bear cubs gather enough nuts, seeds and blueberries, Mama Bear has agreed to make her special, lip-smacking-good pie. Each time they fill their baskets, the cubs count berries, seeds and nuts by putting them in groups of tens and ones to see if they have enough for pie. Everyday

activities such as sharing a meal, sorting socks and getting ready for school can be part of learning math. In the MathStart Series, everyday life is the basis for each entertaining story. Simple math concepts are embedded in each story so that young children can intuitively understand them. Adults can use the creative suggestions for activities in the back of each book to extend learning opportunities with children. Developmentally appropriate and correlated to school grade levels and the curriculum standards of the National Council of Teachers of Mathematics, MathStart can give children a head start! Blue Ribbon Blueberry Pie is the best—but do these bear cubs have enough ingredients to bake one? Regrouping their berries, nuts, and seeds by tens and ones reveals that one cub has not done her fair bear share. John Speirs's irresistible bear cubs make this lesson in regrouping one children will enjoy. Blue Ribbon Blueberry Pie is the best—but do these bear cubs have enough ingredients to bake one? Regrouping their berries, nuts, and seeds by tens and ones reveals that one cub has not done her fair bear share. John Speirs's irresistible bear cubs make this lesson in regrouping one children will enjoy.

There can be only three in the Freaky Joe Club Those are the rules, set down by Freaky Joe himself in the big red book, slightly chewed on one corner and wrapped in a locked bicycle chain. The newest chapter of the Freaky Joe club consists of Conor, Timmy, and Jack, and their mission is to solve crimes and fight evil in Ship's Cove, Texas -- if they can only convince anyone that there is evil in Ship's cove. In their latest case, the freaky Joe Club has to found out who wants to keep the Ship's Cove Octopi's from winning a charity swimathon. What happened to the Octopi's life-size cutout of Sam Houston? Who could have taken it except their archrivals the Sylvan Glen Sharks.? How can you compete against Sharks when you have a really stupid theme song? And most of all,... Who is Freaky Joe?

Perry the Penguin needs 9 clams to buy an ice scooter -- but he's not very good at saving. As Perry earns, spends, finds, loses, and borrows clams, a simple line graph demonstrates the concept of negative numbers.

Frog friends, Matty and Moe, are off with a "Ready, Set, Hop!" They both made it to the rock, but who's in the lead? If Matty hopped 5 hops and Moe hopped 2 more hops than Matty, then the score is 5 to 7. But then they're off again. Any child who can add or subtract can build a simple equation, and Matty and Moe make it fun. As readers count along with Stuart J. Murphy and Jon Buller they will sharpen their problem solving skills and find out which frog is the better hopper.

No one will play with poor Kangaroo--his friends all have too much to do! But little does he know that his buddies are busy using multiplication to plan a big birthday surprise.

Offers numerous lists of fun, factual, and trivial issues, such as discontinued ice cream flavors and most popular websites for kids, along with "netiquette" tips, helpful references, and more. Original.

It's Kangaroo's birthday, but no one will play with him: not the emu, the platypuses, the koalas, or even the dingos. They all have too many things to do. What exactly are they doing? They're using multiplication to figure out just how
