Shahbazov says that as a member of the Russian-led Collective Security Treaty Organization (CSTO), Armenia was " mostly only able to get Russian-made weaponry, receiving batches of weapons from ...

The numerous dense woodlands and swamps that covered the western portions of European Russia presented severe problems for the German invaders and occupation forces. In conformance with the assignment, this study had to be confined to a discussion of tactical principles when operating in those areas. Apart from tactical principles, however, another problem calls for serious consideration -- the problem of education and training, of teaching self-confidence to young men of military age and of training them in the art of improvisation. The need for this training is pointed out in the final section of this study.

The Soviet Army: Operations and Tactics FM 100-2-1 This field manual is part of FM series 100-2, The Soviet Army. The other volumes are FM 100-2-2, The Soviet Army: Specialized Warfare and Rear Area Support, and FM 100-2-3, The Soviet Army: Troops, Organization and Equipment. These manuals cannot stand alone, but should be used interchangeably. These field manuals serve as the definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare. These manuals represent the most current unclassified information and they will be updated periodically. More information would become available in the event of war or national emergency. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. https://usgovpub.com

10) Army Group South (7 April-7 May 1945) by Lothar Dr. Rendulic (army group commander).

At the start of the campaign on the Eastern Front, in the earliest days of Operation Barbarossa, it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad, Moscow and Stalingrad. The ill-prepared and under-resourced Russian forces were forced to retreat. Gradually, the balance of the war swung in favour of the Russian forces, whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east. Critical in the Soviet victory was its armour; tanks such as the T-34 proving the equal, if not better than, some of the tanks available to the Germans. This authoritative history of the Soviet forces before and during World War 2, reveals the development of their tactics in the early post-revolutionary era right through to the ultimate victory in Berlin in May 1945. The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs, many of which have never been seen before.The photographs include images of tank training in the 1920s and 1930s, on active service, and many compelling pictures from some of the major tank battles of the day. Over the past five years, aided by the opening up of archives in Russia previously closed to western experts, there has been a massive growth in interest in the events that occurred on the Eastern Front. Russian Tanks is an important addition to the literature currently available, exploring as it does, the vitally important Soviet armour of the period.

PRINTED IN COLOR - The Russian Way of War - Force Structure, Tactics, and Modernization of the Russian Ground Forces Published by the U.S. Army Training and Doctrine Command G2's Foreign Military Studies Office in 2016, this book picks up where the FM 100-2 series left off and discusses Russian military structure, capabilities, and future development. Includes July 2019 BONUS materials on the following: \*1K17 Szhatie (1 17 ) Russian "Stiletto" Laser Tank \*Combat Laser System (Peresvet) Russian Laser Cannon \*T-14 Armata Main Battle Tank \*T-15 Heavy Infantry Combat Vehicle \*Kurganets-25 Light Tracked Armored Vehicle \*2S35 Koalitsiya-SV 152-mm Self-Propelled Howitzer \*VPK-7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free? This is a reproduction of the 1984 Department of the Army Field Manual 100-2-3 (The Soviet Army: Troops, Organization, and Equipment). In its day, it - along with its sister publications FM 100-2-1 and 100-2-2 - was the "definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare." St. Michael Publishing House has re-printed these so that the military scholar and student of history may learn from other nation's way of war.
