*** Accompanies BBC2's major new TV series and The Story of Music in 50 Pieces on Radio 3

*** In his dynamic tour through 40,000 years of music, from prehistoric instruments to modern-day pop, Howard Goodall leads us through the story of music as it happened, idea by idea, so that each musical innovation - harmony, notation, sung theatre, the orchestra, dance music, recording, broadcasting - strikes us with its original force. He focuses on what changed when and why, picking out the discoveries that revolutionised man-made sound and bringing to life musical visionaries from the little-known Pérotin to the colossus of Wagner. Along the way, he also gives refreshingly clear descriptions of what music is and how it works: what scales are all about, why some chords sound discordant and what all post-war pop songs have in common.

Why did prehistoric people start making music? What does every postwar pop song have in common? A “ masterful ” tour of music through the ages (Booklist, starred review). From Mozart to Motown and beyond, this “ racy written, learned, and often shrewdly insightful ” social history reveals music ’ s role in our societies as well as its power to affect us on a personal level (The Daily Telegraph). Once a building block of communication and social ritual, today music is also a worldwide tangle of genres, industries, and identities. But how did we get from single notes to multilayered orchestration, from prehistoric instruments like bone flutes to modern-day pop? In this dynamic tour, acclaimed composer and broadcaster Howard Goodall leads us through the development of music as it happened, idea by idea. In Goodall ’ s telling, each innovation that we now take for granted — harmony, notation, dance music, recording — strikes us anew. And along the way, Goodall gives listeners a crash course in how music works on a technical level. The story of music is the story of human ambition: the urge to invent, to connect, to rebel. Offering “ a lively zip through some forty-five millennia, jumping back and forth between classical, folk, and pop, ” Howard Goodall ’ s beautifully accessible and entertaining ode to joy is a groundbreaking look at just how far we ’ ve come (The Sunday Times, London).

bewilderingly complex and specialised. In his energetic tour through 30,000 years of music, from prehistoric instruments to pop, Goodall does away with stuffy biographies, unhelpful labels and tired terminology and leads us through the story of music as it really happened, so that each musical innovation strikes us with its original force. He focuses on what changed when and why, picking out the discoveries that revolutionised man-made sound. Along the way, he also gives refreshingly clear descriptions of what music is and how it works: what scales are all about, what happens in harmony, why some chords sound discordant. The story of music is the story of our urge to invent, connect, rebel -- and entertain. Howard Goodall's beautifully clear and compelling account is both a hymn to human endeavour and a groundbreaking map of man's musical journey.

An introduction to music that traces the development of instruments, styles and techniques, and shows how they have changed over the centuries.

"A dauntingly ambitious, obsessively researched" (Los Angeles Times) global history of music that reveals how songs have shifted societies and sparked revolutions. Histories of music overwhelmingly suppress stories of the outsiders and rebels who created musical revolutions and instead celebrate the mainstream assimilators who borrowed innovations, diluted their impact, and disguised their sources. In *Music: A Subversive History*, Ted Gioia reclaims the story of music for the riffraff, insurgents, and provocateurs. Gioia tells a four-thousand-year history of music as a global source of power, change, and upheaval. He shows how outcasts, immigrants, slaves, and others at the margins of society have repeatedly served as trailblazers of musical expression, reinventing our most cherished songs from ancient times all the way to the jazz, reggae, and hip-hop sounds of the current day. *Music: A Subversive History* is essential reading for anyone interested in the meaning of music, from Sappho to the Sex Pistols to Spotify.

On March 2, 1965, "The Sound of Music" was released in the United States and the love affair between moviegoers and the classic Rodgers and Hammerstein musical was on. Rarely has a film captured the love and imagination of the moviegoing public in the way that "The Sound of Music" did as it blended history, music, Austrian location filming, heartfelt emotion and the yodeling of Julie Andrews into a monster hit. Now, Tom Santopietro has written the ultimate "Sound of Music" fan book with all the inside dope from behind the scenes stories of the filming in Austria and Hollywood to new interviews with Johannes von Trapp and others. Santopietro looks back at the real life story of Maria von Trapp, goes on to chronicle the sensational success of the Broadway musical, and recounts the story of the near cancellation of the film when the "Cleopatra" bankrupted 20th Century Fox. We all know that Julie Andrews and Christopher Plummer played Maria and Captain Von Trapp, but who else had been considered? Tom Santopietro knows and will tell all while providing a historian's critical analysis of the careers of director Robert Wise and screenwriter Ernest Lehman, a look at the critical controversy which greeted the movie, the film's relationship to the turbulent 1960s and the super stardom which engulfed Julie Andrews. Tom Santopietro's "The Story of 'The Sound of Music'" is book for everyone who cherishes this American classic.

Theft: A History of Music: This comic lays out 2000 years of musical history. A neglected part of musical history. Again and again there have been attempts to police music; to restrict borrowing and cultural cross-fertilization. But music builds on itself. find that musicians have been borrowing - extensively borrowing - from each other since music began. Then why try to stop that process? The reasons varied. Philosophy, religion, politics, race - again and again, race - and law. And because music affects us so deeply, those struggles were passionate ones. They still are. The history in this book runs from Plato to Blurred Lines and beyond. You will read about the Holy Roman Empire's attempts to standardize religious music using the first great musical technology (notation) and the inevitable backfire of that attempt. You will read about troubadours and church composers, swapping tunes (and remarkably profane lyrics), changing both religion and music in the process. You will see diatribes against jazz for corrupting musical culture, against rock and roll for breaching the color-line. You will learn about the lawsuits that, surprisingly, shaped rap. You will read the story of some of music's iconoclasts - from Handel and Beethoven to Robert Johnson, Chuck Berry, Little Richard, Ray Charles, the British Invasion and Public Enemy. To understand this history fully, one has to roam wider still - into musical technologies from notation to the sample deck, aesthetics, the incentive systems that got musicians paid, and law's 250 year struggle to assimilate music, without destroying it in the process. Would jazz, soul or rock and roll be legal if they were reinvented today? We are not sure. Which as you will read, is profoundly worrying because today, more than ever, we need the arts. All of this makes up our story. It is assuredly not the only history of music. But it is definitely a part - and a fascinating part - of that history. We hope you like it.
