Four Girls With Dark Secrets To Share - Misty, Star, Jade, and Cat.
Now in one volume.

"We lived in such a perfect world. Why were we so imperfect?" All Misty ever wanted was a normal family. But like so many others, Misty's parents didn't stay together. Now they use Misty to hurt each

Download File PDF The Wildflowers 1 4 Vc Andrews

other, to deliver tiny cruelties in an endless stream. Misty knows her parents might love her. But Misty has an unspeakable secret that burns in the core of her very being: she hates them. Misty isn't as alone as she thinks. She's about to meet three other girls who are just like her -- each one with their own dark secrets to share....

"I felt like I was going to my own execution...." Cat had listened patiently as the other three girls in Dr. Marlowe's therapy group shared their innermost feelings. They had described their broken families honestly, to the point of pain. If Cat doesn't tell her own tale, the others will see it as a betrayal. So she has no choice. Or does she? Maybe she could lie -- just make something up. Anything would be better than the truth. For Cat has the darkest, most horrifying secret of them all....

THEY BEGAN AS STRANGERS -- FOUR TEENAGE GIRLS WITH NOTHING IN COMMON BUT THEIR MISERABLE CHILDHOODS. SOON, THEY WOULD REALIZE THAT THEIR SECRET PASTS HAD BOUND THEM TOGETHER FOREVER.... Misty, Star, Jade, and Cat first came together in Dr. Marlowe's group therapy sessions. They trusted no one but each other -- and even that bond was fragile at best. One by one, each of the Wildflowers told her own story and bravely unveiled the inner wounds inflicted by years of lies, deceit,

and untold family secrets; each revealed the shocking tales of how their parents hurt them, used them, or simply abandoned them. And as they shared their darkest feelings, they no longer felt like lost souls with nowhere to turn. Finally, years of loneliness and pain gave way to the realization that someone else in this world understood them. But then the sessions ended, and the girls didn't know if they would ever see each other again. Now they are coming together one more time. Jade has sent out invitations to her parents' mansion -- the sprawling, opulent home that served as a battleground for much of her young life. There, the four will rekindle their bonds of friendship and trust. But this time, away from Dr. Marlowe's watchful eye, it will be different. Today, in the mansion's attic, Star, Jade, Cat, and Misty will take each other's hands and swear to tell the real truth -- the shattering secrets that lie deep within them like smoldering coals. And once the darkest secret of all is spoken aloud, there will be no turning back. For there may be some things the Wildflowers should leave buried forever....

Star hides her pain, like the other girls in the therapy group that's supposed to help them. But she knows how she feels deep in her heart. Even though her mother and father are still alive, they are dead to her. Today, it is her turn to reveal her secrets. Star will tell her

story to doctor Marlowe and the others, and she will finally face the dark nightmares of her past....

Learn to identify 46 of the most important wildflowers: lady's slipper, black-eyed susan, bird's foot violet, cardinal flower, pitcher plant, trout lily, and others. Botanical identifications, common names, and information on habitats are also included. Color versions of flowers included on covers.

This beautifully illustrated guide identifies nearly 300 common plants in Indiana's most prominent ecosystem—the Eastern Deciduous Forest. For ease of identification, the plants are arranged by flower color or growth form, providing a convenient way to distinguish a great majority of plants in any given woodland. Generous treatment is given to all major vascular plant groups of the forest, such as wildflowers, ferns, shrubs, trees, grasses, and sedges. Michael A. Homoya not only helps with identification, but also offers information on a plant's habitat, flowering period, familial relationships, biology, and connections to Indiana. For the garden enthusiast and habitat restorer, there is a section on landscaping and natural community restoration using native forest plants. A portion of the proceeds from each sale of this book go to the Indiana Department of Natural

Resources for land protection and stewardship.

The Mojave Desert eco-region extends from eastern California to northwestern Arizona, southern Nevada, and southwestern Utah, and boasts plant communities as diverse as alkali sinks, dune systems, Joshua tree woodland, pinyon juniper woodland, mixed mojave scrub, and even riparian woodland. This fully updated and revised edition will be appreciated not only by amateur wildflower enthusiasts, but experts will also find the detailed photographs and charts useful in distinguishing among similar species in difficult groups. Species are arranged by color and plant family for easy identification. This guide features 300 of the common species, full-color photographs (many brand new to this edition), detailed descriptions, information on bloom season, and interesting facts about each plant.

All she wanted was to be someone's little girl.... Fate made her a lonely orphan, yearning for the embrace of a real family and a loving home. But a golden chance at a new life may not be enough to escape the dark secrets of her past....

ALL SHE WANTED WAS A FAMILY SHE COULD CALL HER OWN.... As an orphan girl, Crystal was one of many -- and utterly alone. But she still
