An indispensable tool for clinicians and users that has been fully updated and reformatted in a user-friendly manner.

An updated resource for adolescents and adults with limited or emerging reading skills.

This workbook is for stroke survivors with aphasia to improve receptive language function. It contains a wide range of exercises appropriate for both individuals with severe deficits as well as those with mild receptive aphasia. The workbook contains: matching exercises, yes/no questions, "wh" questions, 1 step directions, multiple step directions, directions using functional materials and images, exercises targeting comprehension from sentence level up to short stories and functional math problems to improve attention and cognitive processing skills.

Written in the best-selling format of the WALC series, these activities have: easy-to-read format simple, concise language application to a wide range of acquired language disorders consistent progression of complexity within and between tasks Activities are organized by five skill areas: Matching and Identification Tasks begin simply, with single, more concrete items and progress to more complex tasks. The tasks are receptive. Clients match shapes, letters of the alphabet, and words. Then, they match written words, phrases, and sentences to pictures. Following Commands Clients follow oral and written directions requiring comprehension of body parts, objects, prepositions (e.g., over, out), and adjectives (e.g., heaviest, shortest). Vocabulary These activities target deficits in comprehension and expression. Clients choose words and supply words to complete word pairs, familiar phrases, and synonyms. Other tasks include matching words to simple definitions and clues; naming items by word class; and supplying item functions and descriptions. Answering Questions The client either listens to, or reads a sentence, and answers simple wh- questions. The questions require one-, two-, and three-word responses. Yes/no questions about object functions progress from simple (e.g., Do boats float?) to more complex and abstract (e.g., Is a road wider than a sidewalk?). Comparison, before/after, and simple reasoning questions round out the activities. Functional Language These activities build on the previous units by increasing the complexity and content level. Questions may have more than one right answer or require expression of opinions. Tasks include cloze phrase and sentence completion, open sentence completion, paragraph comprehension, paragraph fill-in-the-blanks, predicting from a short story, and formulating short stories. 222 pages, answer key

This workbook contains full color large photographs for a variety of exercises to improve expressive language function for people with aphasia. There are photographs of everyday objects with instructions and cues to help increase word finding ability. Photographs of famous places and objects target naming as well as provide a launching point to create discussion and increase conversation skills. The workbook contains safety awareness photographs to help with descriptive language skills as well as tackle new strategies to prevent falls secondary to unfamiliar physical challenges that many stroke survivors encounter. The workbook also contains photo sequences with cues to help increase discussion of steps involved in an action. There are photographs for comparison and discussion of pros and cons of multiple attributes. The final section provides multiple photographs with interesting details to stimulate conversation and improve expressive language therapy either at home or in a speech therapy setting.

Expressive and written language workbook for stroke survivors diagnosed with aphasia for use at home and therapy. Contains straightforward instructions for family members to use this workbook at home to increase expressive language of their loved one diagnosed with aphasia. Includes 70 full color photographs of functional objects to increase naming ability and full color photographs of scenes to increase descriptive language skills. Sections also include: carrier phrases, rote naming, divergent naming, convergent naming, functional writing exercises, reading exercises, "wh" questions, melodic intonation exercises and conversation exercises.

Workbook to target activities of daily living. Focusing on cognition, memory, attention, sequencing and problem solving skills. Targets everyday tasks: shopping, budgets, medication management, appointments, dining out, schedules and more.

THE ADULT SPEECH THERAPY WORKBOOK is your go-to resource for handouts and worksheets. It was designed for speech therapists new to adult speech therapy and covers the most common diagnoses and disorders across all adult speech therapy settings, from hospitals, to skilled nursing facilities, to home health. This workbook is packed with over 580 pages of practical, evidenced-based treatment material.
